

CUSTOMER USER GUIDE

# Your Medkart Store Purchases

How to find an eligible purchase, view its invoice, understand savings and report an issue

|          |                                                              |
|----------|--------------------------------------------------------------|
| AUDIENCE | Customers using the proposed authenticated mobile experience |
| FEATURE  | Medkart Savings Journey — MVP concept                        |
| SCREENS  | History, detail, savings, issue, status and claim            |
| VERSION  | 0.1 • 19 July 2026                                           |
| DATA     | All examples and transaction details are fictional           |

**Purpose** Explain the proposed feature in simple language while setting honest expectations about linking, savings and support.

**Disclosure** Proposed portfolio operating model based on the Medkart Savings Journey case study. This is not Medkart’s current SOP, policy or service commitment.

# 1. Find a store purchase

## 1. Sign in

Use the account connected through the approved Medkart verification process.

## 2. Open Purchases

Eligible linked store purchases appear newest first.

## 3. Choose a purchase

Check the store, date, amount and status before opening it.

## 4. If nothing appears

Use Claim a purchase or contact support. No purchase detail is shown until verification succeeds.

**Important** Not every store transaction may be eligible or linked immediately. A missing record does not mean your printed store bill is invalid.

## What the status can mean

| Status      | Meaning                                                        |
|-------------|----------------------------------------------------------------|
| Completed   | The linked purchase is currently recorded as completed.        |
| Adjusted    | The amount or item state changed after the original bill.      |
| Returned    | A return/refund update has been recorded.                      |
| Protected   | Details are hidden while ownership or an issue is reviewed.    |
| Unavailable | Some information cannot be shown safely or reliably right now. |

## 2. View details and your invoice

### Purchase details

Review the store, date, line items, quantity, amount, discount and current status when available.

### View invoice

Open or download the secured digital invoice. If it is unavailable, retry or use the support route.

### Amount paid

This should match the authoritative transaction after returns or adjustments.

### Something is wrong

Use the issue action instead of sharing transaction screenshots publicly.

### If the invoice does not open

- Check your connection and retry once.
- Keep your printed invoice if you received one at the store.
- Use Report issue or the approved support channel if the problem continues.
- Never send passwords, OTPs or payment credentials to obtain an invoice.

### 3. Understand a displayed saving

#### Amount paid

The amount recorded for the purchase after applicable discounts and adjustments.

#### Comparable price

An approved reference used for the explanation—not an arbitrary estimate.

#### You saved

The difference calculated using the stated method and eligible items.

#### Unavailable

If a reliable comparator is missing, no savings amount should be invented. The app should explain that it is unavailable.

**Please note** A linked purchase or savings display does not provide medical advice and does not prove that medicine was consumed. Ask an authorized healthcare professional for clinical guidance.

## 4. Report a problem safely

9:41 100%

INDEPENDENT CONCEPT • FICTIONAL DATA

← **Report a purchase issue**  
Invoice MK-10482

Do not include prescription, diagnosis or unnecessary medical details.

☒ **This purchase is not mine**  
Protect the record and start identity verification.

☐ **I see a duplicate purchase**  
The same invoice appears more than once.

☐ **Amount or status looks incorrect**  
Total, refund, return or purchase status needs review.

☐ **I cannot open the invoice**  
The digital invoice is missing or unavailable.

**Optional note**  
Add only information needed to explain the issue

**Submit Issue**

### 1. Select the issue

Choose Not mine, duplicate, incorrect amount/status or invoice unavailable.

### 2. Keep notes minimal

Do not enter diagnosis, dosage, prescription details, passwords or OTPs.

### 3. Submit

You should receive a case reference and safe status.

### 4. For “not mine”

The disputed record should be protected while it is reviewed.

## When to contact support

- You can see a purchase that is not yours.
- A purchase remains duplicated or shows the wrong return/refund state.
- The invoice or savings explanation appears inconsistent.
- A claim repeatedly fails or the app asks for unsafe information.

## 5. Claim a missing purchase

9:41 ● ● ● 100%

INDEPENDENT CONCEPT • FICTIONAL DATA

← **Claim a store purchase**  
For purchases not linked automatically

**Verify before viewing details**  
Medicine, amount, and invoice details remain hidden until the purchase can be matched safely.

**Privacy-first claim**  
A contact number alone may be insufficient when numbers are shared, changed or recycled.

**Invoice number**  
MIC

**Purchase date**  
18 / 07 / 2026

**Verification code**  
6-digit code

The actual verification method must be approved by identity and privacy owners.

**Verify and claim**

**I need help**

This screen intentionally reveals no transaction or medicine detail before verification.

### Start safely

Enter only the approved invoice reference/date and complete the approved verification challenge.

### No detail before verification

The app should not reveal items, amounts or medicine information while the match is uncertain.

### No match or ambiguous match

Use the support route. Repeated guessing may be limited to protect customers.

### Successful verification

The purchase can be added to history only after ownership is confirmed.

## 6. Privacy and safety reminders

- Use your own account and a trusted device. Sign out on shared devices.
- Do not share purchase screenshots publicly.
- Medkart support should never ask for your password or OTP.
- A purchase does not automatically provide consent for refill reminders.
- For urgent medical needs, use the appropriate clinical/emergency channel—not a product support case.

**Prototype note** Screens, support routes, pricing and case references in this guide are fictional examples created for a Product Associate portfolio.
