PROFILE

Founder's Office intern and final-year Computer Science and Design student experienced in picking up unclear priorities, creating structure, communicating ideas, and keeping work moving. Built and operated a placement platform used by 255 students, ran three program cohorts from a pool of 70+ applications, and supported multidisciplinary teams through product demonstrations, documentation, coordination, and follow-ups.

SELECTED WORK

Lexi Commercial Exercise | Independent candidate exercise

- **Research before reaching out:** Selected a relevant legal prospect using public information and developed a personalised approach for introducing Lexi to a Tech M&A practice.
- **Make a complex product simple:** Developed a concise, Suits-inspired pitch showing how Lexi can support contract review, tabular analysis, and drafting within one legal matter.
- **Move interest into action:** Created cold outreach, post-demo follow-up, re-engagement messaging, and a founder update designed to move a hypothetical customer conversation towards a controlled pilot.

Disclosure: No outreach was sent. This work was not commissioned by Lexi or Khaitan & Co.

EXPERIENCE

Founder's Office Intern | Shivansh AI & Innovation Labs

May 2026 - July 2026

- **Explain products clearly:** Led 20 product walkthroughs and stakeholder sessions, translating product capabilities into practical use cases and responding to questions in real time.
- **Turn ambiguity into action:** Created 10+ instruction guides, workflows, and requirement documents that converted unclear requests into work developers could execute.
- **Keep teams moving:** Coordinated meetings and follow-ups across three teams and tracked 10+ tasks through completion without requiring constant founder involvement.
- **Bring people up to speed:** Helped onboard an expert consultant by organising project context, meetings, and working information from the beginning.

LEADERSHIP AND PROJECTS

Founder and Facilitator | Ancient Intelligence Lab

- **Build from scratch:** Created and operated three cohorts, managing 70+ applications, 14 offers, 10 participants, and 7 graduates.
- **Adapt when the first approach stops working:** Shifted from conversation-heavy sessions to practical challenges when coordinating multiple student timetables became difficult.

Creator and Operator | Crack Your First Job

- **Start without a playbook:** Built and operated a placement-information platform across three colleges, reaching 255 active users and recording 2,600 user events.
- **Own the unglamorous work:** Reviewed college emails, maintained deadlines, monitored analytics, resolved issues, and added resources after identifying repeated student questions.

President | ISTE ADIT Student Branch

2025

- **Listen before deciding:** Spoke individually with 30+ students and redesigned events around facilitated group discussions.
- **Turn repeated work into a system:** Created an SOP that enabled a fresher team to execute five events without senior involvement.

Training and Placement Student Coordinator | ADIT

2026

- **Coordinate under pressure:** Managed 60+ people during a placement event, kept activities on schedule, and ensured every participant received individual feedback.
- **Scale what works:** Expanded a placement-preparation learning module from supporting 3 students to supporting 15 students.

EDUCATION AND CAPABILITIES

B.Tech in Computer Science and Design

A.D. Patel Institute of Technology, Anand
July 2023 - July 2027 | CGPA 8.45
